

Category 5e UTP Patchcord

The electrical performance of these patchcords exceeds TIA/EIA and ISO/IEC class E specifications and are fully backward compatible with Category 5 cable and connectors. Improved anti-snag feature provides maximum protection from snagging during moves and rearrangements.

FEATURES

- 24 AWG stranded bare copper
- Good margin in channel test
- PVC sheath or LSZH sheath
- Universal TIA/EIA 568A or TIA/EIA 568B wire map
- Various lengths and colors

PHYSICAL SPECIFICATIONS

Parameters	Value
Contact material	Phosphor bronze
Contact plating	Gold 50 micro-inch; nickle 100 micro-inch
Operating temperature	14°F to 140°F (-20°C to 60°C)

ELECTRICAL SPECIFICATIONS

Parameters	Value
TIA/EIA category	5e
